To the people and government of Ukraine

My father fought with the Russians against NAZI Germany and Japan.

He along with my mother are war heroes, among so many, and their story I will tell now as I ask you to recognize Russia as your allies as my family did at an important time in history.

I myself and am Atomic Veteran, a person like those in the fictional movie Mulholland Falls who at Atomic Proving grounds were exposed to radiation and the US Government wishes to cover-up.

The DNA testing at that time included my father after the war, after his role in the atomic bombing of Japan as a P-51 escort plane with Combat Camera recon fitting, followed up by Las Vegas blast exposure testing and follow studies.

Donald Ewen Cameron, Dr Sidney Gottlieb, the Great Britain Commonwealth countries have long and illegally experimented with DNA and the activities usually violate human rights law, fund Free Mason based organizations, and profiteers of Defense Contracting and aerospace.

It is my belief the activities of the USA which have long victimized my family continue in the Ukraine, in world orphanages, and in black markets and criminality in the form of human trafficking, corruption, illegal science, and threats to the subversion of governments by illegal trafficking.

Russia has always had a policy against genocide, eugenics, and criminal organizations of trafficking of the history of Rockefeller medicine tied to Standard Oil influences on countries.

While such entities are difficult to stop Vladimir Putin had made the best effort so far.

The USA media corporations will not out many CIA or FBI programs in the world so little help can be found there.

Those who know the best report the Ukrainian independent government is under corrupt leadership/

I urge the acceptance of Russian allegiance in the fight against corruption and illegal science.

Sincerely.,

Edward Paul Donegan
